Delivering the capability to win new business.
In an increasingly competitive market, logistics leaders turn to experienced solutions providers who understand your business and its unique challenges. From supporting multiple companies with diverse requirements and discrete inventory to reducing costs, improving performance and increasing sales, the challenges you face are many. We know, because we help logistics operations like yours survive and thrive in this environment every day. Born and bred in the demanding Third-Party Logistics world, Codeworks is uniquely qualified to provide your third-party logistics, vendor-managed and/or contract operation with the capability to win new business.

We offer sophisticated functionality with a simplified approach you’ll find refreshing. As a single source for business consulting, full-featured and fully-integrated products, installation, training and exceptional support, you only need one point of contact. The warehouse and transportation solutions you receive include all the options—standard—so your costs don’t increase when your transactions, users or locations do. Maximizing your productivity while minimizing your supply chain interruptions, (the hidden variable in determining your true total cost of ownership) has never been easier. Your tangible Return on Investment (ROI) goes from rapid to immediate and “sophistication, simplified” suddenly makes sense.

Compare the capabilities you receive with our solutions, making it easy for you to increase productivity, reduce costs and win new business. Read the record-setting improvements our customers achieve with our solutions and consider the possibilities for your operation. Codeworks is the solutions provider who understands your logistics operation, offers the products and services you need today and shares your passion for excellence.

- Direct Sales
- Electronics
- Food, Food-Related & Beverage
- Glass
- Hardware
- Health Care
- Lumber
- OEM
- Plastics
- Roll Fabrics
- Tapes

**Codeworks, llc**
Enterprise-Level Visibility & Management
Our simplified, value-priced approach to licensing includes management of regions, campuses, buildings, labor, docks and workflow with the conversion of your first location. Manage both pallets and lots and offer your customers the ability to track their freight by all valid international weight types. Comprehensive visibility beyond the four walls of your operation has never been easier.

As seasoned industry professionals, we know that an enterprise-level license must include the ability to grow from a few hundred thousand square feet to several million without an increase in price, so that’s what you receive. With a single license, you can manage up to 10,000 customers and millions of products. You reduce your costs and increase your profitability, both now and over the long term.

Flexible Radio Frequency
Functionality and flexibility go hand-in-hand, so the comprehensive capabilities you receive include support for any 802.11x handheld RF device, maximizing your flexibility. Enjoy the benefits of improved operational accuracy with inbound staging & directed “putaway,” requisition picking, scheduled item moves and automatic replenishment of empty primary locations.

The Speed of Sound
Voice picking continues to grow in popularity for a number of good reasons. Receiving pick requests by headset and confirming picks by voice keep the operators’ hands free. Not only do you improve the safety of your work environment, you improve your throughput as well. Without the need for handheld scanning devices and/or paper-based lists, eye contact stays focused on order locations and picking tasks, reducing operator fatigue and improving picking accuracy. Warehouse staff enjoy choosing their favorite “virtual” voice, improving both acceptance and productivity, while you enjoy the quick return on investment.

“Using WDLSRF, we conducted a blind, dual-count, audited, physical inventory of 1.2 million cases. The prior physical count occurred 3 years ago. The dual counts & recounts were recorded in 4 hours using RF devices. The comparison to book was completed in only 6 hours resulting in a difference of less than 500 cases. Our client measured the accuracy at .996 – their best result ever.”

Graham Swank, General Manager Southwest Logistics

The Capability To Win New Business
Our flexible functionality includes the ability to complement your RF needs with market-leading pick-to-voice products like Inther™. Consider the improvements in productivity that voice-directed receiving, put-away, stock transfer, order fulfillment and replenishment would bring to your operation. We can help you get there.

**RFID Capability**

You will also enjoy the theft-reducing capabilities of radio frequency identification (RFID) to improve your operating margins. The industrial-strength functionality you receive includes support for both RFID readers and printers, but we don’t stop there. We’re already compliant with the most stringent EPC Global Standards.

Take advantage of our many capabilities and grow your operation while reducing your costs. With the improved efficiencies you receive, you can offer more competitive prices to win new business.

**Sensible Security**

Our built-in security is designed from the ground up for unparalleled productivity. With the capability to define access by groups, menus, menu options, screens or individual users and/or roles, you see just what you need to do the job. Keep It Simple, Superstar.

**Comprehensive Inventory Management**

With a Codeworks solution, your inbound processing begins outside the four walls from your first notification. Offer your customers the convenience of entering their own orders with their own desktop web browser. You can also receive orders by Electronic Data Interchange (EDI), desktop computer and even by radio frequency devices.

When inbound freight arrives, handling cross-docking, damaged, over and short conditions are easy. Automated reverse logistics/return goods management processing increases your operational throughput, while producing receiving documents and labels becomes quick and simple. Our standard kitting functionality includes the ability to kit by either order or request, while our automatic FIFO or LIFO product rotation minimizes spoilage. And when you’re ready to streamline the supply chain throughout your organization, take advantage of our automatic Purchase Order update and reorder capabilities.

**Order Processing Efficiency**

We know your business is moving freight at maximum efficiency, no matter the warehouse size or level of automation. Even if you’re paper-based today and want to be paperless in the future, that’s okay. With our product, you can use both methods simultaneously. Enjoy the flexibility of a wide range of picking methods to maximize your productivity. And staying focused on order fulfillment priority is easy with a simplified, color-coordinated interface.

Location and quantity overrides are no problem, either. Dynamic consignee addressing, comprehensive manifesting capability and the ability to store your customers’ ship-to addresses make preparing shipments a snap. For outbound freight, you can easily produce UCC128 shipping labels and ship in either batch or real-time.

When your needs include parcel and freight shipping, take advantage of our seamless integration with Varsity Shipsoft™, the market leader with deployments in over 1,000 distribution centers. Shipsoft supports a wide array of shipping needs from single-site domestic to multi-location global shipments. Our core functionality includes all the 3PL-based, real-time billing capabilities you need, making efficient, on-time deliveries easy.

*“The Voice technology we implemented has led to productivity gains that even I could not have imagined... With the help of Codeworks’ systems and staff helping to implement these changes, we gained an additional 20% productivity improvement we did not expect.”*

Larry Landtiser, General Manager, Strategic Customer Operations
ODW Logistics, Inc.
**Seamless Integration**
The products you receive are team players, acknowledging the strength of diversity while adhering to standards of excellence throughout. Sophisticated interfaces to your existing systems are complemented by simple and centralized data validation capabilities. Improving data quality has never been easier to achieve. And when it’s time to update the rules, make one simple change and everybody plays by them, real-time.

Should your integration needs include browsers, delimited files or Enterprise Resource Planning (ERP) systems such as BAAN, Great Plains, J D Edwards, Oracle, Peoplesoft or SAP, we’re happy to hear it. Suffice it to say we haven’t found a system yet we didn’t like. The core functionality you receive also supports Excel worksheets, File Transfer Protocol (FTP) and/or web services.

“...our customers are thrilled with WDLS’s interface capability, especially with such major systems as SAP and other proprietary programs. The ability of WDLS to provide a paperless operating environment for high volume, high SKU facilities on a 24 hour 7 day a week basis keeps us in a leadership position in 3rd Party contract operations, and is one of the key building blocks of our success.”  
Jack Mackenzie, Vice-President  
ODW Contract Services

We interact daily with over 300 E-Commerce Trading Partners and so can you. It’s easy for you to increase customer visibility and efficiency with our extensive EDI capabilities that include manual or automatic real-time e-mail notifications.

**Real-Time Reporting**
Your customers can now have improved visibility to their inventory throughout the supply chain with real-time, web-based reporting. Offer the ability to download several customized worksheets, providing a higher level of customer service without increasing your staff. Our capabilities allow you to achieve a higher degree of inventory accuracy and with our forecasting capabilities, you can reduce your inventory costs. The net result is ultra-competitive pricing to win new business.

At Codeworks, not only are our products team players, but we are, too. We see things from your perspective, so our installation plans include a generous amount of time for training and support.

“...The WDLS-e Commerce module trades 90% of our activity electronically which has increased our accuracy and significantly reduced our overhead.”  
Darby Strickland, President  
Shippers Warehouse

“We experience with WDLS software over the past three years has been one of stability, flexibility, ease of use, and exemplary support. Our operation is complex, running multiple warehouse operations in different environments on one server. The systems ease of use through all of this complexity is the best I’ve encountered.”  
Jim Houpt, Manager of Operations  
Logisco

**The Capability To Win New Business**
**Integrated Transportation Management**

Our transportation management solution allows you to deliver higher productivity in your freight operations at a lower cost, a welcome delivery, indeed. Seamlessly integrated with our warehouse management solution and your existing systems, the benefits you receive are many.

Compare your margins for each order across all carriers before you ship, always making the most profitable choice. With rising fuel costs, our capabilities are crucial to maintaining healthy growth margins and competitive prices. Automatically validate Carrier Invoices and store unlimited shipment and load address types. Pool shipments to further reduce your costs. Store your delivery routes as you add new customers and dynamically modify routes to maximize your efficiency. With EDI capabilities, electronic transmission of freight invoices and automated payment feeds to Accounts Payable, our transportation management solution really delivers.

**Industrial-Strength Infrastructure**

Our platform is extremely stable, highly scalable, and fully integrated. Security, communications, an industrial-strength DB2 database, administration and full vendor support are all included with the operating system. The storage design of our solutions provide a level of efficiency that is unparalleled by any other, built from the ground up for extreme transaction volume with the lightning-fast response times you need.

Our integrated database is engineered to handle millions of transactions, accessed with SQL, XML, or its own native methods, all at the same time. The database supports transaction rollback, audit trail journals and remote journaling to off site servers for disaster recovery. And there’s no need to worry about data integrity, as our solution comes standard with secure and seamless multi-user record-level access control.

This integration of system architecture, services, database, and world-class hardware provide the stable foundation for the complex software requirements and around-the-clock operations you need, all with a minimal level of staffing. You can either utilize this sophisticated functionality on your existing iSeries server or take advantage of our “no infrastructure” hosted solution.

**Exceptional Customer Support**

A true business partnership is built on a foundation of support from our seasoned professionals who know the logistics industry. We’re as familiar with your industry as our products, and you receive the generous amount of professional, responsive support you’d expect from a true business partner.

When you call us, you won’t hear a computer-generated voice, but a real person, ready to help. We’re here to support you, 24/7/365, just the way you like it. Our exceptional support is but one reason why we haven’t lost a single customer.

**Comprehensive Capabilities**

Codeworks is uniquely qualified to help you win new business with the following capabilities:

- 3PL specialists who understand your business
- Products and services applicable to a wide range of facilities and industries
- Real-time supply chain visibility beyond the “four walls” with web-based order entry, reports and downloads that satisfies the most discriminating visibility requirements
- Full-featured and fully-integrated products that include all the options–standard-maximizing your throughput
- Support for any 802.11x Radio Frequency devices, maximizing your flexibility
- Comprehensive integration and automated notifications, increasing your throughput without increasing staff
- A single point of contact for business consulting, warehouse and transportation management products, installation, training and support, maximizing your productivity
- Value-priced licensing that keeps costs low when transactions, users and/or locations increase; your prices stay ultra-competitive over the long term
- Experienced, professional, responsive customer support

**Codeworks, LLC**
The World Is Our Warehouse
At Codeworks, we believe our responsibility extends beyond the warehouse to the planet at large. While we adhere to quality standards in all we say and do, we believe that we can still communicate the exceptional value of our products and services in an eco-friendly way. To us, good business also means being a good steward.

This paper was manufactured with 100% wind energy and processed without chlorine. Printed on 80% post-consumer recycled paper, it is Ancient Forest-Friendly and Forest Stewardship Council-certified. All colors used are eco-friendly soy and vegetable inks. At Codeworks, green is more than just a color in our logo. It’s the way we do business.
About Us
Since 1995, Codeworks has helped Third-Party Logistics providers grow their logistics business and exceed diverse customer expectations. More than just a software provider, we are a 3PL business solutions specialist, offering business consultation, comprehensive software solutions, seamless integration, training and ongoing support to clients nationwide. Every day, our solutions process tens of thousands of orders, ship many tons of freight and manage millions of square feet of warehouse space.

We also make it easy for our current and future customers to keep up-to-date on industry news, trends and tips with our quarterly e-newsletters, delivered right to your Inbox. Timely and concise, it’s just what you’d expect from a true business partner.

Codeworks offers web-based demonstrations of our products from the comfort of your office. We welcome the opportunity to discuss how we can help optimize your operation, substantially improve your competitive advantage and deliver the capability to win new business.
